Inventory management should not be underestimated, as it will have an impact on the supply of your products.

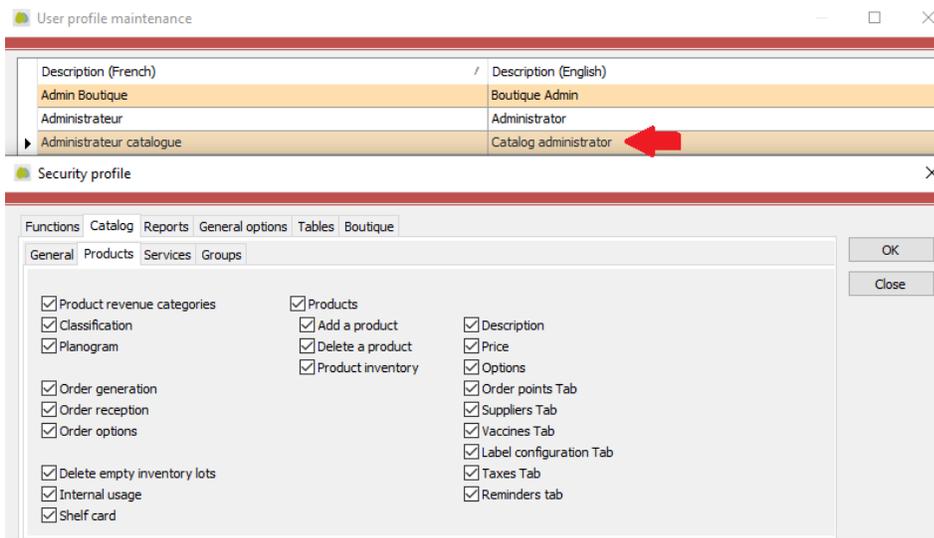

Good inventory management will ensure that you always have the products you need, in the quantities you need, and will save time and money.

1. User profile access

Limit access to inventory management to 2 or 3 employees (depending on your establishment). This will ensure more stable management.

For example, one employee for food and accessory inventory management and one employee for medication management.

Under « Configuration » > « Tables » > « User profile » you'll find a « Catalog administrator » profile. This profile has all the access required for inventory management and should be used for your employees who will be in charge of inventory management.

2. Inventory Management

2.1 First inventory

To set up a good base, take the necessary time to adjust the inventory of your products in your catalog according to the actual quantity you have in stock.

2.2 Inventory tracking

A rigorous follow-up must be carried out by your management staff to ensure that there are no errors in your inventory. Establish a follow-up (monthly or bimonthly), according to your availability, of your inventory to ensure its authenticity. Correct any errors.

2.3 Inventory adjustments

2.3.1 Adjustment transaction

In the product catalog, select your product and click on « Inventory ».

Only your employees with the « Catalog administrator » user profile should have this access, in order to maintain control over the inventory.

Select your transaction type for inventory adjustment:

- **Correction (decrease):** Allows you to decrease your inventory. You may enter a note in the « Comment » field to explain this inventory adjustment.
- **Correction (increase):** Allows you to increase your inventory. You may enter a note in the « Comment » field to explain this inventory adjustment.
- **Expired**
- **Delivery**
- **Waste:** Used to decrease inventory when you can't find the cause of a drop inventory.
- **Return inventory:** Increased your inventory following a return from a supplier (e.g. free of charge). You may enter a note in the « Comment » field to explain this return of inventory.
- **Return supplier:** Allows you to decrease inventory when you must return a product to a supplier. You may enter a note in the « Comment » field to explain this product return to the supplier.
- **Internal use:** When you use a product internally. Adding a comment will let you know where the product was used in the clinic.
- **Transfer:** For multi-establishment clinics only, to transfer products from a one establishment to another.

2.3.2 Internal use

It is possible to deduce an internal use of a product using the inventory transaction described above (section 2.3.1) for users with the « Catalog administrator » profile.

You can also use the icon  in the menu. To use the function from the menu, you'll need a barcode reader (VetWare's recommended model).

Internal use ×

Use the barcode scanner to select a product

Product:

Quantity: Date: 24-Oct-2023 ▼

Description:

3. Controlled substances

For all your controlled substances, the inventory can be tracked by lot.

| | | | |
|---|--|--|--|
| Product description | | Invoice description | |
| French: <input type="text" value="Phenobarbital 100mg /co"/> | | <input type="text" value="Phenobarbital 100mg /co"/> | |
| English: <input type="text" value="Phenobarbital 100mg /co"/> | | <input type="text" value="Phenobarbital 100mg /co"/> | |
| Revenues category: <input type="text" value="Drug"/> | UPC: <input type="text"/> | <input type="checkbox"/> Invalid | <input type="checkbox"/> Prescription required |
| Classification: <input type="text" value="Medication"/> | DIN: <input type="text"/> | <input type="checkbox"/> Group use only | <input type="checkbox"/> Exclude prescription fee |
| Manufacturer: <input type="text" value="<N/A>"/> | Logs: <input type="text" value="<N/A>"/> | <input type="checkbox"/> Show on recommendations | <input checked="" type="checkbox"/> Controlled substance |
| Planogram: <input type="text" value="<N/A>"/> | | | <input checked="" type="checkbox"/> Track inventory by lot |

When selling or prescribing, you must select the lot that has been used. It will be impossible to sell a quantity greater than the quantity remaining for this lot.

When inventory is not tracked by lot for a controlled substance, the system will itself select the lot from which inventory will be deduced.

| | | | |
|--|--|---|---|
| Product description | | Invoice description | |
| French: <input type="text" value="Phenobarbital 60mg /co"/> | | <input type="text" value="Phenobarbital 60mg /co"/> | |
| English: <input type="text" value="Phenobarbital 60mg /co"/> | | <input type="text" value="Phenobarbital 60mg /co"/> | |
| Revenues category: <input type="text" value="Drug"/> | UPC: <input type="text"/> | <input type="checkbox"/> Invalid | <input checked="" type="checkbox"/> Prescription required |
| Classification: <input type="text" value="Accessory"/> | DIN: <input type="text"/> | <input type="checkbox"/> Group use only | <input type="checkbox"/> Exclude prescription fee |
| Manufacturer: <input type="text" value="<N/A>"/> | Logs: <input type="text" value="<N/A>"/> | <input type="checkbox"/> Show on recommendations | <input checked="" type="checkbox"/> Controlled substance |
| Planogram: <input type="text" value="<N/A>"/> | | | <input type="checkbox"/> Track inventory by lot |

***** This option is not recommended for your injectable products, as when your bottles are empty, you will still have a quantity in inventory in the software, due to frequent losses with each dose take from the bottle. You will then need to make an inventory adjustment in the lot in question to set it to 0 *****

If the product has only one lot, it will obviously select this one to decrease the inventory.

Be careful, in such situation, the software will allow you to sell a quantity greater than the quantity in inventory, resulting in a negative inventory for your lot. If your negative inventory is not corrected, the software will continue to select this lot for future sales, even if other lot are available. This will have an impact on your controlled substances logs, your inventory and your order generations.

Product inventory for Ketamine inj. 100mg/ml - Solutions Vet inc. test 5.10

Establishment: Solutions Vet inc. test 5.10 Date of the transaction: 25-Oct-2023

| Lot No | In stock | Transaction type | Quantity | Expiry | Manufacturer lot | Transfer destination | Comment |
|--------|----------|------------------|----------|-------------|------------------|----------------------|---------|
| 16 | -6 | | | 28-Feb-2025 | | | |

If the product has more than one lot in inventory, the software will select the lot with the nearest expiration date by default. It will stop at 0 and pick the next lot (if there is one).

Product inventory for Ketamine inj. 100mg/ml - Solutions Vet inc. test 5.10

Establishment: Solutions Vet inc. test 5.10 Date of the transaction: 25-Oct-2023

| Lot No | In stock | Transaction type | Quantity | Expiry | Manufacturer lot | Transfer destination | Comment |
|--------|----------|------------------|----------|-------------|------------------|----------------------|---------|
| 16 | 2 | | | 28-Feb-2025 | | | |
| 17 | 50 | | | 31-Aug-2025 | | | |

In the above example, if a quantity of 3 is sold, the software will first select the lot #16 (since the expiration date is closer). It will decrease a quantity of 2 from this lot and then use lot #17 to decrease the remainder of the quantity sold.

4. Order

Good inventory management will improve your order management.

4.1 Order point

The aim here is to have a minimum order point that will enable you to have the product in stock at all times, and a maximum order point so as not to have too much stock in your establishment. You'll need to adjust these order points frequently to achieve the right balance between sales and deliveries.

Order points Suppliers Vaccines Label configuration Applicable taxes Reminders

Activate orders

Order when at:

Order up to:

| Order # | Created date | Status | To receive |
|-----------|--------------|--------|------------|
| No orders | | | |

Show Receive

In the example above, the software is told that there must be a maximum of 3 bags of food in inventory in the clinic, and that when the inventory is at 2 or less, it must generate an order for this product to bring the inventory back up to 3.

The order point is directly linked to the product's « Qty/Format », which can be found in the « Supplier » tab.

| | | | | | | | | |
|-------------------------------------|----------|----------------|-------------|-----------|----------|---------------------|------------------|-----------|
| Order points | | | | Suppliers | Vaccines | Label configuration | Applicable taxes | Reminders |
| By default | Supplier | Product number | Qty./Format | | | | | |
| <input checked="" type="checkbox"/> | CDMV | 112948 | 12 | | | | | |
| * <input type="checkbox"/> | | | | | | | | |

For all products sold by unit (tablet, mm, tinned food, etc...) you must enter the quantity contained in the container (100 tablets, 50ml, 12 tins, etc...).

Your order point will show, for example, a minimum order point of 4 tins and a maximum order point of 12 tins. When you have 4 tins lefts, the software will generate an order for 12 tins (1 crate).

Order points **Suppliers** Vaccines Label

Activate orders

Order when at:

Order up to:

When a product is in one of your opened orders (new, partial delivery or confirmed), the software will decrease the quantity in that order to generate a new order.

| Order # | Created date | Status | To receive |
|---------|--------------|------------------|------------|
| ▶ 3447 | 2020-02-25 | Partial delivery | 1 |

In the example above, I have 1 bag left in inventory and my order point indicates that I need 3 bags. Under normal circumstances, an order of 2 bags would be generated. However, as there is already a bag in a partial order, only 1 bag will be generated for the new order.

5. Sales

5.1 Bar code reader

To minimize inventory errors due to sales, the use of a barcode reader is strongly recommended.

Contact the Solutions Vet teams to find out which models are compatible with VetWare.

First, make sure you enter the UPC of your products in your catalog. Note that you can scan the product's UPC code into the appropriate field using your barcode reader to avoid errors.

| | | | |
|---------------------|---|---|---|
| Product description | | Invoice description | |
| French: | RC Vet. Diet canine Adult bte / 385 g UN. | RC Vet. Diet canine Adult bte / 385 g UN. | |
| English: | RC Vet. Diet Canine Adult Can / 385 g UN. | RC Vet. Diet Canine Adult Can / 385 g UN. | |
| Revenues category: | 10001 NC Adulte 9p72 | UPC: | 070705605046  <input type="checkbox"/> Invalid |
| Classification: | Accessory | DIN: | <input type="checkbox"/> Group use only |
| Manufacturer: | <N/A> | Logs: | <N/A> <input type="checkbox"/> Show on recommendations |
| Planogram: | <N/A> | | <input type="checkbox"/> Prescription required |
| | | | <input type="checkbox"/> Exclude prescription fee |
| | | | <input type="checkbox"/> Controlled substance |
| | | | <input type="checkbox"/> Track inventory by lot |

For products without a UPC code, you can use the icon  to generate a code. You can then print a label with this UPC code and stick it on your item to scan it at the point of sale.

You can also force the use of the barcode reader when selling products with a UPC code. Go to « Configuration » > « General options » > « Others ».

General options

| | | | | | | | | | |
|--|---------------|-------|--------|----------|----------|-------|-------|------------------|-------------|
| Installation | File location | Email | Limits | Printers | Printing | Files | Other | Appointment book | Integration |
| <p>Catalog mode of operation: Standalone</p> <p>Option code: 2</p> <p>Start of the active period: 01-Mar-2023</p> <p>Number of days of history on the account: 60</p> <p>Number of days for shift history: 1</p> <p>Number of expiry days by default: 120</p> <p>AM/PM time split: 12:00</p> <p><input checked="" type="checkbox"/> Activate monthly service charges of 2,0 % after 30 days</p> <p><input checked="" type="checkbox"/> Warn user if patient is still here</p> <p><input checked="" type="checkbox"/> Warn user if client has appointment(s) when creating a new one</p> <p><input type="checkbox"/> Display statement as seen on invoice</p> <p><input checked="" type="checkbox"/> Confirm invoicing</p> <p><input checked="" type="checkbox"/> Automatically search addresses with the same postal code</p> <p><input checked="" type="checkbox"/> Force the usage of the bar code scanner when selling products with a UPC code from this station</p> <p><input type="checkbox"/> UPC bar code scanner is configured for VetWare / LogiVet</p> <p><input checked="" type="checkbox"/> Force the person email address confirmation</p> <p><input type="checkbox"/> Veterinarian estimate assignment required</p> <p><input checked="" type="checkbox"/> Confirm if animal is insured</p> | | | | | | | | | |
| | | | | | | | | OK | Cancel |

When the function is activated, you will not be able to make a client or counter sale by selecting a product with UPC in the drop-down menu of the description.

VetWare / LogiVet

 The barcode scanner must be used on this workstation for all items with a UPC code.

OK

5.2 Refund

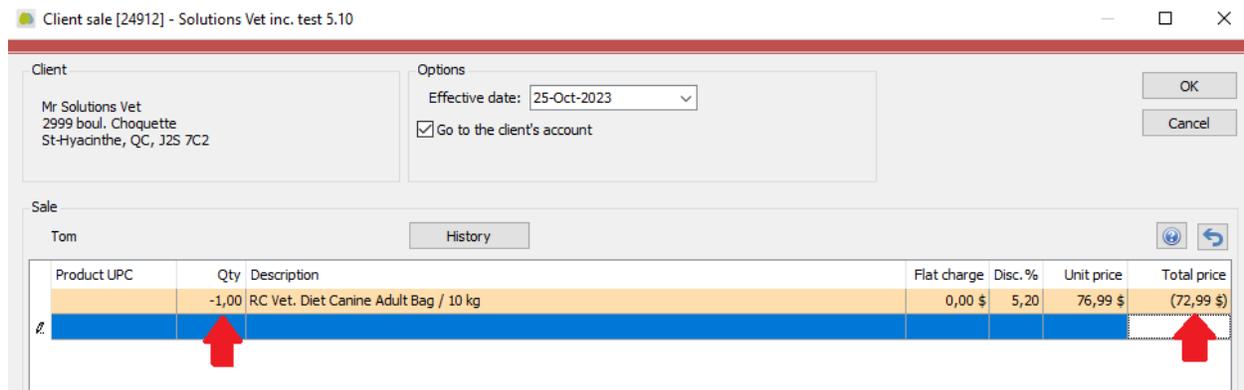

For all refunds, avoid making an « Adjustment » in the client’s account = False sale. Product inventory will not be restored, and this will distort GL account data.

5.2.1 Undamaged product for resale

Simply resale the product in negative quantity « -1 ».

Make sure that the original selling price is still the selling price at time of refund. If the price is not the same, adjust it at the time of refund.

The product will then be put back into inventory in your catalog.

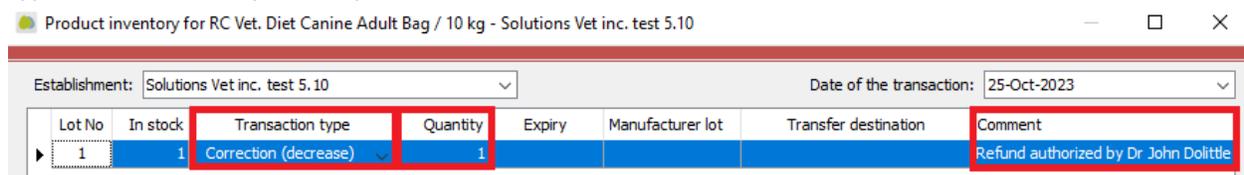

5.2.2 Product not suitable for resale

Resale the product in negative quantity « -1 ».

Make sure that the original selling price is still the selling price at time of refund. If the price is not the same, adjust it at the time of refund.

The product will then be put back into inventory in your catalog.

Then make an inventory adjustment for this product using the « Correction (decrease) » adjustment type and leave an explanatory comment for the correction.

5.2.3 Product warranty by the supplier

Resale the product in negative quantity « -1 ».

Make sure that the original selling price is still the selling price at time of refund. If the price is not the same, adjust it at the time of refund.

The product will then be put back into inventory in your catalog.

Then make an inventory adjustment for this product using the « Return supplier » adjustment type and

leave an explanatory comment for the correction.

Product inventory for RC Vet. Diet Canine Adult Bag / 10 kg - Solutions Vet inc. test 5.10

Establishment: Solutions Vet inc. test 5.10 Date of the transaction: 25-Oct-2023

| Lot No | In stock | Transaction type | Quantity | Expiry | Manufacturer lot | Transfer destination | Comment |
|--------|----------|------------------|----------|--------|------------------|----------------------|--|
| 1 | 1 | Return supplier | 1 | | | | Animal #1234 - Supplier product issue recall |

5.3 Group

The configuration of your different groups can also help you with your inventory.

For example, you could have groups for your different laboratory tests, and insert all the products you need to carry them out.

In this example, some of the products in the group will not be invoiced, but they will be decreased from your inventory.

Group elements

| | Description | Chargeable | Visible | Discount (%) | Quantity |
|-----|--|-------------------------------------|-------------------------------------|--------------|----------|
| ▶ S | Blood analyse - Biochemistry | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | 0.00 | 1.00 |
| S | Blood collection | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | 0.00 | 1.00 |
| P | Catalyst Chem 15 Clip | <input type="checkbox"/> | <input checked="" type="checkbox"/> | 0.00 | 1.00 |
| P | Catalyst Lyte 4 - clip | <input type="checkbox"/> | <input checked="" type="checkbox"/> | 0.00 | 1.00 |
| P | Catalyst Pipette Tips | <input type="checkbox"/> | <input checked="" type="checkbox"/> | 0.00 | 1.00 |
| P | Catalyst Lithium Heparin Whole Blood Separator | <input type="checkbox"/> | <input checked="" type="checkbox"/> | 0.00 | 1.00 |

When the quantity of a product sold may vary with each sale, we recommend that you enter a quantity of « 0 » for this product in the group.

Group elements

| | Description | Chargeable | Visible | Discount (%) | Quantity |
|-----|--|-------------------------------------|-------------------------------------|--------------|----------|
| ▶ S | Castration CANINE | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | 0.00 | 1.00 |
| S | Castration - Cryptorchidism (retained testicle) extra charge | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | 0.00 | 0.00 |
| P | Atro SA (Atropine 0.5 mg/ml) Vial 30ml | <input type="checkbox"/> | <input checked="" type="checkbox"/> | 0.00 | 0.00 |
| P | Glycopyrrolate Inj. Multidose 0.2 mg/ml Vial/20ml | <input type="checkbox"/> | <input checked="" type="checkbox"/> | 0.00 | 0.00 |
| P | Torbugesic 10mg/ml vial/50ml | <input type="checkbox"/> | <input checked="" type="checkbox"/> | 0.00 | 0.00 |
| P | Atravet Injectable 10 mg/ml Vial/50 ml | <input type="checkbox"/> | <input checked="" type="checkbox"/> | 0.00 | 0.00 |

The software will force you to enter a quantity when selling.

The screenshot shows a software interface with a table of services and products. A modal dialog box is open in the center with a yellow warning triangle and the text "The quantity is invalid". Below the dialog is a table titled "Transactional detail" with columns: Quantity, Description, Lot, Flat char..., Discount %, Unit price, and Total price. The table contains several rows of medical services and products.

6. Reports

6.1 ABC cycle count

This report allows you to see which products are worth keeping in stock and which are not, based on the revenue they generate per quantity sold.

It shows the rating and value of products based on their sales.

ABC Cycle count - from 07-Aug-2024 to 07-Aug-2024

| Product Description | Supplier name | Supplier number | Cote | ABC Value | Inventory |
|--|---------------|-----------------|-------|-----------|-----------|
| Food | | | | | |
| RC Vet. Diet Canine Calm Bag / 8 kg | CDMV | 116298 | 60.66 | A | |
| PPVD Formula DH Dental Health Canine Professional Pack Bag / 14.5 kg | CDMV | 110483 | 57.76 | B | |
| Hill's Prescription Diet feline k/d Renal Stew Vegetables Fish and Rice 2.9 oz | CDMV | 116128 | 27.79 | C | |

* Invalid products appear in italic

The rating value is calculated based on the cost of the product multiplied by the quantity sold during the period selected in the report.

The ABC value is calculated by revenue category:

A = Part of the 20% of products in the revenue category with the highest rating.

B = Products with a rating between 20% and 50% of the products in the revenue category.

C = Among the 50% of products in the revenue category with the lowest rating.

6.2 Inventory

We recommend that you check this report regularly to correct any errors.

Allows you to see the current inventory of each of your products, along with their purchase value.

Inventory by category

| Product | Product no. | UPC Code | Cost | Qty | Value |
|--|---------------|--------------|----------|-------|-----------|
| RC Vet. Diet Canine Adult Small Dog Bag / 4 kg | 112942 - CDMV | 030111481603 | 25,32 \$ | 7,00 | 177,24 \$ |
| RC Vet. Diet Canine Dental Bag / 14 kg | 112953 - CDMV | 030111498328 | 78,91 \$ | 10,00 | 789,10 \$ |
| RC Vet. Diet Canine Dental Bag / 3.5 kg | 112951 - CDMV | 030111498359 | 26,06 \$ | 7,00 | 182,42 \$ |
| RC Vet. Diet Canine Dental Bag / 8 kg | 112952 - CDMV | 030111498304 | 52,49 \$ | 5,00 | 262,45 \$ |
| RC Vet. Diet Canine Dental Small Dog 10 kg | 116779 - CDMV | 030111498458 | 64,40 \$ | 3,00 | 193,20 \$ |
| RC Vet. Diet Canine Dental Small Dog Bag / 15 kg | 112949 - CDMV | | 12,29 \$ | 15,00 | 184,35 \$ |

Invalid products will be displayed on the report only if there is a lot present in the inventory of that product, regardless of the quantity contained in the lot (-1, 0, 1).
