Notes: (21/21)
10,00 ; Round up to 9 cents

If you don't want to change the price of certain products, simply uncheck them from the list.

In the « Notes » field, you can enter a description to help you recognize this price change if you ever need to restore it.

Notes: (21/21) FOOD CATEGORY
10,00 ; Round up to 9 cents

When you are ready to make the price change, click « Apply ».

Note that this function will set the price of your products as a fixed price. This means that any changes to the unit cost or factor will not affect the sale price.

VetWare / LogiVet ×

WARNING!
Some of the prices you want to apply are calculated from a markup. If you continue, the new prices will become fixed prices.
Do you really want to continue?
Prices with markup: 21 / Prices to apply: 21.

Unit cost:	62,51 \$	Flat charge:	0,00 \$
Markup:	1,3500	Fixed price:	<input checked="" type="checkbox"/>
Round to:	No rounding	Sale price:	92,89 \$

If you don't want your sale price to be a « Fixed price », you need to modify the unit cost, which will then be multiplied by the mark up to give you the sale price (without fixed price). The order confirmation function can help you adjust the unit cost of your products. (See Module 3, section 6.4).

When you are ready to make the price change, click « Apply ».

2. Restore prices

If at a later date you wish to revert to the previous fixed prices, simply go to « Catalog » > « Price increase » > « Restore prices ».

From this Window, you can restore the price change of your choice.

If you don't remember what you did on a certain date, there's a section at the bottom of the window detailing who made the changes, how many items were changed, the amount in % or \$, the rounding performed and the note you entered.

3. Suggested sale price management

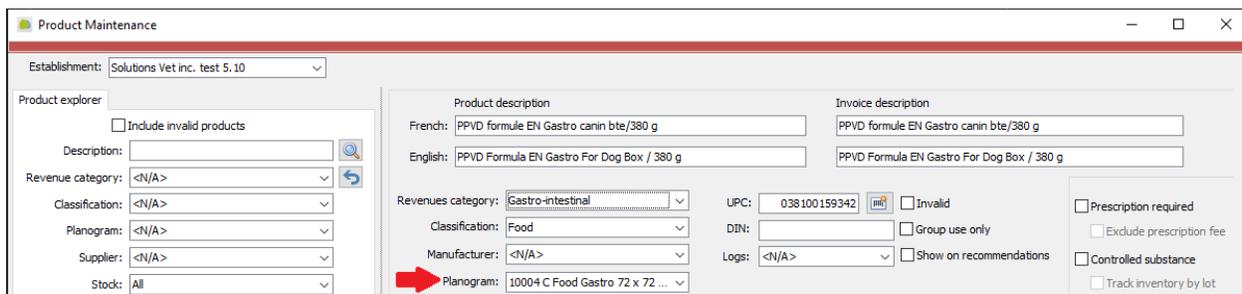

This feature will help you updated your suggested retail prices (sale price) for « Boutique » products on a weekly basis.

***** The management of the suggested retail prices is possible with a subscription to the service via CDMV. Please consult your CDMV representative for details. *****

It is important to understand that sales price synchronization is based on the supplier code of each product. Please ensure that your supplier codes are correct to avoid errors.

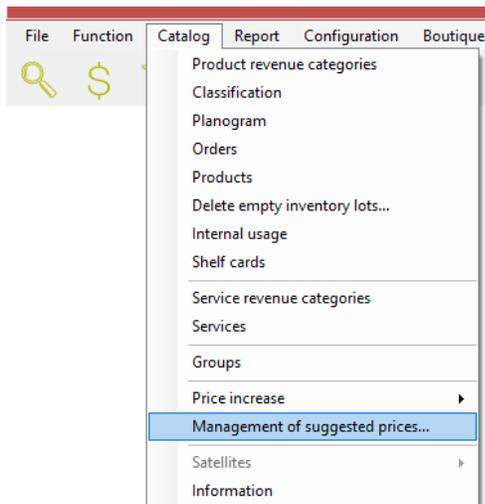

In addition, if you sell products in a format different from the purchase format (e.g.: pack of food can sold by unit) and the supplier code is associated with your product sold by unit, then the price synchronization will modify your sale price for the pack price.

You must first select a planogram for each product that you wish to synchronize retail prices.

To create a planogram, go to « Catalog » > « Planogram ». Click on the « Add » button then enter the description.

To synchronize suggested retail prices, go to « Catalog » > « Manage Suggested Prices ».

Select the planogram to update. The list of affected products will be displayed. Click the « Synchronize prices » button.

*The new costs are displayed for information only.
Please use the order confirmation feature to update your costs.

When a product's suggested retail price is different from your current price, it will appear **GREEN**.

Description (18/18)	Product No.	Current Cost	New Cost*	Current Sale Price	Suggested Sale Price
<input checked="" type="checkbox"/> Collar Clip for Dog - Camo Medium	127079	8,17	8,17	0,00	13,99

If a product appears in **RED**, this product cannot be synchronized.

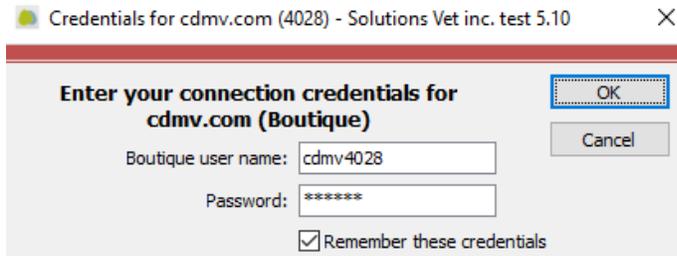

<input type="checkbox"/> Acétaminophène 500mg /co	9007	0,58		0,00	
---	------	------	--	------	--

Contact your CDMV representative with the product code and description so that they can verify with CDMV whether or not the product in question is eligible for suggested retail price synchronization.

Please note that updating cost prices in your software is done with the order confirmation function (See module #3, section 6.4). The « New costs price » are displayed for information only and cannot be modified from this location.

Enter your username and password of your CDMV account then click OK.

By updating your prices once a week (recommended on Thursday morning, since CDMV updates prices overnight from Wednesday to Thursday), you ensure that you have no gaps and maximize your profit.

Uncheck the products for which you don't want to apply synchronization, then click « Save ». You will then be able to print the shelf cards for the products whose sale price has been adjusted.
